

WHAT IS CLAIMED IS:

1
2 1. A grip structure comprising:
3 a surface material layer (10);
4 a substrate material layer (20), said surface material layer (10)
5 and said substrate material layer (20) laminated with each other; and
6 a plurality of evenly distributed bonding combination points (30)
7 secured between said surface material layer (10) and said substrate material
8 layer (20), so that said surface material layer (10) can be bonded and combined
9 with said substrate material layer (20) by said bonding combination points
10 (30).
